The prior art, US Pat. 582,073 of the PTO-1449 has been crossed-out since said patent (Title; Gas or Oil Engine) has nothing to do with the instant invention.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8 and 25 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The added "**at 25 °C**" for the solubility of the water insoluble dye in the specification and claims constitutes New Matter since the originally filed specification does not provide any support for it. Applicant states that the solubility measurement "at 25 °C" is the accepted standard if the reference does not state a different temperature. However, applicant failed to provide any prior art showing such statement.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1714

Claims 21-23, 25, 26 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ishizuka et al (US 2001/0023267 A1).

Ishizuka et al teach composite polymer-oil soluble dye particles having an average particle size of 3-200 nm comprising a polymer and a dye in [0038]-[0039]. Various oil soluble (water insoluble in another words) dyes taught by Ishizuka et al meet the instant water solubility. Ishizuka et al also teach employing dispersions aids, dispersions stabilizers and neutralizing agents in [0328]-[0335] meeting the instant components. Said neutralizing agents such as sodium hydroxide are associated with the polymer-dye particles.

It would have been obvious to one skilled in the art at the time of invention to make coloring particles (composite polymer dye) having an average particle size of less than 100 nm and to utilize said dispersions aids, dispersions stabilizers and neutralizing agents in Ishizuka et al since choosing a range (less than 100 nm) within a range (preferred 3-200 nm) is considered a *prima facie* obviousness and since Ishizuka et al also teach employing dispersions aids, dispersions stabilizers and neutralizing agents absent showing otherwise.

Process claims 1-7, 9-15 and 21 are allowed.

Claims 24 and 27-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1714

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
